Permaducto S.A. de C.V

Project date:

March 2023

Water Depth:

13 m

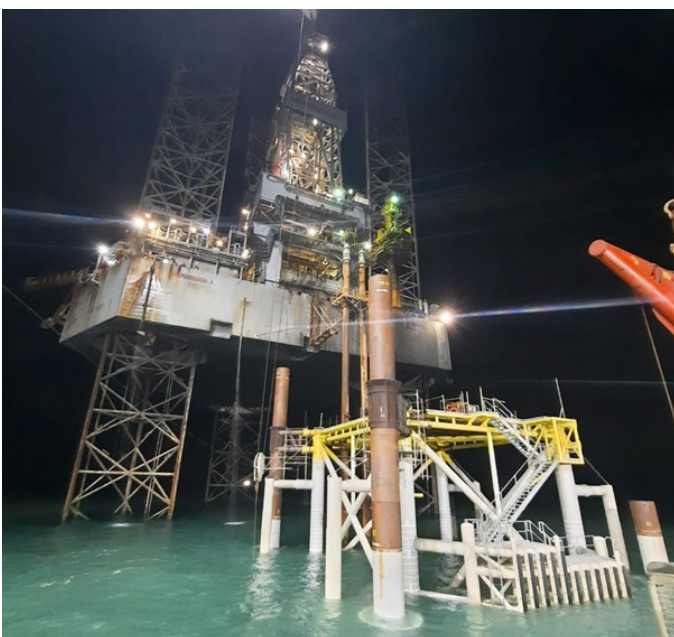

Grouting Time:

2 days

**GROUTING OF ELM22
4-LEGGED PLATFORM
MEXICO**

DISCIPLINES:

- Offshore Contracting
- Offshore Installation Grouting
- Pile Sleeve Grouting

In March 2023, Nautech carried out grouting work for Permaducto S.A. de C.V. during the offshore installation of ELM22, a 4-legged platform located in the Gulf of México.

The team used 43 Mt of Nautech's NaX® Q80-H high performance cementitious (HPC) grout, pumped at 13 meters water depth.

SCOPE OF WORK

- Grouting installation services at platform ELM22.
- Pile sleeve grouting of 4 legs
- Supply of NaX® Q80-H High-Performance grout.

PROJECT PERFORMANCE

- Our customer accomplished timely delivery of schedule and commitment to the end client.
- All deliverables were achieved with high quality and customer acceptance.

CLIENT TESTIMONIAL

"The use of Nautech's materials in our Projects generates confidence when the grouting process has to be done, great working team."

Ing. Hugo Palafox
Permaducto S.A. de C.V
